

Exercise 11 Creating an External Style Sheet

5 to 10 minutes

In this exercise, you will extract the embedded stylesheet that you created in the last exercise to a new external style sheet.

1. Open `CrashCourse/Exercises/EmbeddedStyleSheet.html` in your editor and save it as `LinkedStyleSheet.html`.
2. Create a new file and save it as `StyleSheet.css` in the same directory.
3. Move all the CSS rules from `LinkedStyleSheet.html` to `StyleSheet.css`.
4. In `LinkedStyleSheet.html`, remove the style block and add a link tag that points to `StyleSheet.css`.
5. Open `LinkedStyleSheet.html` in a browser. It should look the same as Embed
