

## **Exercise 20     Working with Arrays**

**15 to 25 minutes**

In this exercise, you will practice working with arrays.

1. Open `VariablesArraysOperators/Exercises/Arrays.html` for editing.
2. Below the comment, declare a `rockStars` array and populate it with four values entered by the user.
3. Add functionality to the buttons, so that alerts pop up with values from the array when the buttons are clicked.
4. Test your solution in a browser.
