Exercise 15   Font Style, Font Variant and Font Weight
10 to 20 minutes

In this exercise, you will modify Fonts/Exercises/Stories.html by applying font styles, font variants and font weights to different elements on the page.

1.   Open Fonts/Exercises/Stories.html for editing.

2.   Modify the font style, variant and weight of the different elements on the page.
You may do this using inline styles, an embedded style sheet and/or an external style sheet. You are also welcome to add tags to the page. The object of this exercise is to get used to working with these CSS font properties.

3.   When you are done, open Stories.html in your browser to see the results. You are welcome to go back to the code and continue to work.
